

## DALE allergies study has fantastic start

Recently patients were asked to take part in an allergy study when having planned surgery. The DALE study finished on Thursday 14 June 2018 and was only open for three days. In that time County Hospital and Royal Stoke University Hospital recruited 490 patients, this makes UHNM one of the top recruiters in the UK.

Dr Sankaran Narayanan said: "I can't thank staff enough for the fantastic effort and magnificent team work. Recruiting roughly 490 patients to this survey is a fantastic achievement, I feel honoured to be part of this sterling team"
